clasion that 1700 years have clapsed since they I were interred. " THE EMPRESS OF MEXICO.—A letter from Belgium gives some interesting particulars of the unfortunate Empress Charlotte :- During the last three months she has not pronounced the name of Maximilian once, either in a state of lucidity or incluess. Mexico seems to have I been completely efficied from her memory. The es lattacks of nurlaces are rare, and fortunately of - labort duration, and always produce the same -laymptoms -viz, that the place is durty. The Empress whilst passing through the palace will ed stop suddenly and say. It is very filty here: of come quickly, an life ne clean it.". The servants. a last instructed, immediately procure soup and e water, and proceed in scrab the part indicated. This having been done, the Empress retires perie lectly satisfied, and the attack is over, THE SNIDER KIFLE .- Another season's pracis tice with the Enider Rille has unfortunately I shown that it is not the perfect arm that it was hoped It is found that most of the rifles which have gone through much practice have become dam iged, or rather colorged, at the seat of the links of the cartridge. The cartridge therefore, fits loosely into the rifle, which a no longer finally closed by the breech-piece. the consequence being im exape of gas on the explosion of the cartridge, which has, in several instances, blown open the breech

miece, and in some cases destroyed it. This nosatisfictory result is owing to two defects of construction-firstly, that the breech-piece lies in its place merely by its own weight, and is not fastened down, as in other breech-loaders ; and, secondly, that the base of the cartridge has been altered(to make a cheaper article), and is now. not aufficiently strong to resist the explosion of the powder. The Committee on Small Arms. under the presidency of Earl Speacer, whose labours will extend till the autumn, may be reliad upon to decide which is the best arm to be put in the bands of the soldier.—The Owl. THE MOON AND THE WEATHER -If any T' marked connexion existed between the state of the air and the aspect of the moon, it must nie inevitably have forced itself unsought upon the attention of meteorologists. In the weekly ith return of births, deaths, and marriages, issued by the Registrar-General, a table is given. as showing all the meteorological elements for every day of the year, and a column is set apart If for noting the changes and positions of the moon. These reports extend backwards nearly ills in quarter of a century. Here, then, is a reper tory of data that ought to reveal at a glance m- hav such connexion, and would certainly have the slone so had it existed. But no constant relaat I tions between the moon columns and those containing the instrument readings has ever been be traced. Our meteorological observatories furub. nish continuous and unbroken records of at-ub. maspheric variations, extending over long 3- series of years; these afford still more abundant means for testing the validity of the lunar hypothesis. The collation has frequently been

made for special points in the inquiry, and cerbetween certain positions of the moon in her orbit and certain instrumental aveniges; but so small are the effects traceable to lunar influence that they are almost inappreciable among the grosser irregularities that arise from other and na yet unexplained causes, -Ouce a Week. THE ABYSSINIAN BALANCE-SHEET .- The Timer at length following the feeling of the public, and devouring its own bad sentiments) is glad the account against as for the Abyssinian Expedition is extremely short. We have spent live millions of money, and that is all. We have lost hardly a man by disease or wounds, and the havor among the baggage animals is, we presume, included in the Bill. For this sum we have discharged a national duty. and resented our countrymen and their companions from a terrible captivity. We have carned the applause and adminition of Europe, not only by our success, but by our disinterestedness. We have learnt some lessons in the art of war, at any rate, in militury organisation.
Lutus for any accidental fruits of the expedition. there was never surely enterprise so barren. It is fortunate that we need give ourselves but little concern about the political complications which may follow the expedition. We have, at any rate, done the Abyssinians no harar, On

ig the contrary, we have left a good deal of maney er in the country, and perhaps some notions of the fair trade besides. We have made a trank road. a which will last for centuries, and we have presented the population with the spectacle ke, of a railway and the solid gift of a stone pier. THE USE OF EXPLOSIVE RIFLE SHELLS IN WARFARE .- Prince Gortchakoff, on behalf of int the Rassian Government; is understood to H baye taken a remarkable step in the interests III of humanity. For some years ingenious menhave tried to devise a shell bullet which might. dit become available for the rifled masket. Now. jes la shell is a most destructive missile, and a haif is of shells from breech lowlers would be like the blast of death. There can be no reason why. Int. if effective for the purpose explosive holts. le | should not be used to blow up ammunition aris waggons; but the use of such tearing and riving projectiles against human bodies is revolting to the conscience. Yet it is difficult to ket say why, if bullow shot may be thrown from cannon, hollow bullets may not be fired from rilles. Perhaps the reason is that, whereas the ien | solid ball is certain to disable what it strikes.

the shell-bolt is almost certain to kill; that, d, therefore, it is too effective, since the end of a hattle is gained as surely by putting the enemy res here de combat as by slaving him outright. The ne | shell-builet would cause needless carnage, and, by exasperating user, would tend to bring back barkgrous practices. Prince Gortchakoff suglives a that the Powers should hind themselves not to use rifle shells, and the Emperor Napofrom, for one, has readily accepted the proposal

Hongkong, Monday Evening, There was some little activity at the opening ral of the market for Bengal Drug to day, and under speculative operations Patna changed hands at 36575 to \$640, eich and on time. Benares \$6271 to \$630. At these rates more sollers coming forward, and the natives having sun lied their wants, the market declined a little. The etcamers Glengyle and Lightning have about 2,950 chests for this place. The A. Gibb and Duccal expected within a week or ten days, are likely to bring a couple of hundred chests. The out-turn of the ocop of the season 1367-68 consists of about 25,100 chie Patna and 1.800 chests Benares, total, 43,000 chests. but there is a reserve stock for 1869 out of last season's crop heside, which will bring the total quantity to about 45,560. Whether the Govergment will make up the deficiet so as to complete 48,000 chests according to the Budget, implied of the grop of 1868 and 1869; is not ti- as yet known. A memorial on this subject had been addressed to the Government by a certain class of speculators in Calmitta, asking for uy 43,000 chests. The following are to-day's il closing rates, with more sellers than buyers:-Patna \$635 to \$6374, and \$640 to \$6424, on or three weeks' finic 8th sales to arrive. Benarcs

er \$625 to \$6275, weak. Malwa \$655 to \$660. ld little doing. ect | The situation of commercial affairs in this worse every day, so far as actual trade is conperned, and instead of improvement there appears to be less chance every day of selling ty goods. The Chinese are most unwilling buyers even at their own terms of low prices and long deredit, whother from a want of money of a by Adizinelination to lay in any stocks hevond their Lactual requirements does not seem to be very to clear. It is, however, a well established fact within the last two weeks that they will not and do not hay, Beyond a small ich sale of Raw Cotton of 100 bales Bombay Staple nia.
